

Your Flexible, Scalable Fabrication and Integrations Solution

Are you struggling to meet growing demand?

Would you benefit from reduced lead-times, fixed product cost, and flexible scalable capacity.

Are you concerned about capital investment and finding the talent to expand capacity?

Want to focus on your core competencies of product development, marketing and selling?

If so, then consider Earnest Products Fabrication and Integration Solutions.

Our Core Values

Our goal is to provide you with the highest quality products and level of service that we would want for ourselves and our families through our commitment to integrity, respect, teamwork, professionalism and quality.

Engineered for Manufacturability

Your products success begins at the intersection of design and manufacturability. Your new engineering team brings a wealth of experience in design for manufacturability through a multi discipline approach including mechanical, electrical, manufacturing and process engineers, CAD designers and programmers.

About Earnest Products

Earnest Products was founded in 1994 to provide your business with flexible, scalable fabrication and integration solutions to support your dynamic growth.

Program Management

We believe that success starts with people. Your projects will be led by an experienced Product Success Manager with dedicated engineering and production resources to support your program from start to finish with a single point of contact.

Building Block for Success

World class manufacturing requires a solid foundation to ensure your products success.

- Data backed decision making
- New product development process
- Customer focused support team
- Energy consumption optimization
- Predictive and preventative maintenance
- Material handling
- Quality management: ISO 9001:2015
- Sustainable safety program
- Continuous improvement
- Real-time material visibility
- Cross-functional collaboration
- Well rounded communication

Fabrication

Your new factory is equipped with full-service fabrication capabilities, utilizing state of the art punch, laser, form and weld technologies.

Finishing

Give your product the look and durability it deserves with your in-house powder coating featuring a 6 stage pre-treatment process and automated powder application.

Integration

Bring all the pieces together for turnkey key solutions to improve efficiency and reduce your cost. Your 240,000 ft², facility is ideal to support small and large form factor products and includes mechanical assembly, UL wiring capabilities, technology integration, testing, packaging and logistics support.
